PROJECTS

AI Resume Analyzer and Job Recommendation System

Developed a Python and Streamlit-based application that analyzes resumes, extracts technical skills, calculates job matching scores, recommends suitable job roles, identifies skill gaps, and generates a learning roadmap.

Technologies: Python, Streamlit, Pandas, Scikit-learn, NLP

Breast Cancer Detection Using UWB Antenna and Deep Learning

Developed a research-oriented prototype using Ultra-Wideband sensing and deep learning techniques for breast cancer detection. The project focuses on analyzing electromagnetic characteristics and applying machine learning techniques for prediction.

Technologies: Python, Deep Learning, UWB, CNN, ESP32

Counterfeit Medicine Detection Using Blockchain

Developed a concept for detecting counterfeit medicines using blockchain technology to improve medicine traceability and verification.

Technologies: Blockchain, Python
